WE DEVELOP AND MANUFACTURE AUXILIARY POWER UNITS

PBS focuses on continuous R&D, technological innovations and new APU development.

MAIN FEATURES

Our auxiliary power units are capable of supplying compressed air and electrical power across a wide range of operating conditions. With their exceptional reliability PBS APUs reached the global leadership position in the up to 100 kW category.

- › EASA certificated
- › Continuous operation for 6 hours
- › Long service life and easy maintenance
- › High reliability in extreme conditions
- › Highly resistant ECU, increased flight envelope
- › 9+ years TBO

PBS APU FAMILY

We have produced and delivered over 7,000 APUs for use in helicopters and jet trainers. Our comprehensive technical support for APU operations is available not only at our service facilities but also on-site at the customer's location.
